PROCUT

Cutter Bar Protection

Every disc in the mower cutter bar (DRIVE SHEILD MODULE) is protected by a defined shear point in the module. In the event of a collision, the disc is separated from the gear in the cutter bar, thus protecting the drive train.

Quick Fit Blades

Quick-change blades are considered a must by many farmers and contractors. The blades are quick and easy to reverse or replace in situ.

Cutter Bar

The cutter bar is designed in a way that the disc is always throwing the crop into middle of the swath, this makes a nice even swath. This cutter bar is also designed to eject the swath quickly only cutting once. Double-cutting causes higher crop losses, delays regrowth and increases the power requirement on the tractor.

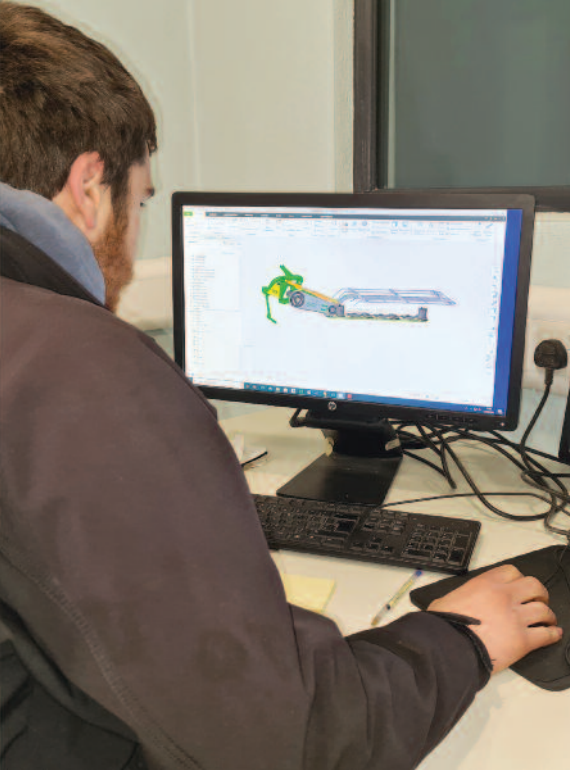

Other features

- Quick fit blades (NEW)
- Galvanized folding frame (NEW)
- Operate from tractor cab (NEW)
- Blade box (NEW)
- Bronze Pivot Bushing
- Robust Structure
- Walterscheid PTO Shaft
- Fast lifting on headland
- Safe and narrow transport
- Heavy Duty pvc cover
- Safety breakaway mechanism

Technical Data	Procut 210	Procut 240	Procut 280
Cutting Width	210m / 7ft	240m / 8ft	280m / 9.3 ft
No. Disc	5	6	7
Drive Shield Module	Standard	Standard	Standard
Quick Fit Blades	Bolt On	Standard	Standard
Blades	105 m / 4 mm	105 m / 4 mm	105 m / 4 mm
Swath Width	1.2m	1.5m	2.0m

Malone was founded in the West of Ireland in 1999 and is dedicated to designing and manufacturing innovative and reliable grass harvesting machinery. Ireland has a long history in intensive grass based farming and so is an ideal location for developing high quality grass harvesting machinery.

The Malone Grassline Product Range is aimed at optimising the volume and quality of forage whilst reducing the cost of fuel, time and labour.

The ProCut disc mower range produce an excellent cut, the geometry of the mower suspension allows for excellent ground contour following capability. Power is effectively transmitted to the cutter bar by the multiband belt.

When designing grassland machinery Malone aim to maximise efficiency and productivity rates whilst maintaining quality, making Malone machinery the best choice for the farmer & contractor alike.
